FACE AXIAL AMPLITUDE FOR A 135.00 MM DIA UNSHAPED CYLINDRICAL HORN

FACE UNIFORMITY FOR UNSHAPED CYLINDRICAL HORNS AT 20.0 KHZ

RELATIVE FACE RADIAL AMPLITUDE FOR UNSHAPED CYLINDRICAL HORNS

FACE RADIAL AMPLITUDE / FACE AXIAL AMPLITUDE AT CENTERLINE

HORN DIAMETER (MM)

FACE DIA D1

UNDERCUT DIA D2 ~ .855 * FACE DIA

REAR DIA D3 = FACE DIA D1
FLANGE LENGTH = .472 [12.0]

R.984 [25.0] (2X)

SHOULDER = .57 * PRISMATIC LENGTH (PER CARD)

TUNED LENGTH

PRETUNED LENGTH

DRILL ø.453 [11.51] X .62 [15.7] DP,
BOTTOM TAP 1/2-20 UNF-2B,
C'SINK ø.55 [14.0] X 60°
INCLUDED ANGLE

-A-

32/ TO ø1.7 [43]

-B-

⊥ .001 A

TOLERANCES
X.XX   ±.01
X.XXX ±.005
ANGLE ± 1°
⌖ .001 TIR | 63√
⊿ .0005 TIR
( ) = NOMINAL
ALL DIMS TYPICAL

REFERENCE

Page 4

REV. | DATE
0 | 11/18/06

NOTES:
1. PRISMATIC LENGTH = TUNED LENGTH OF
UNSHAPED CYLINDER OF DIAMETER D1 WITHOUT STUD.
2. TUNING PROCEDURE: TUNE FROM -B- TO 20000 ±
100 HZ.
3. CARD = COMPUTER AIDED RESONATOR DESIGN

Relative Face Axial Amplitudes
of Ø135 mm Al 7075-T6 Spool Horn

Face

Relative face axial amplitude

Distance from horn centerline (mm)
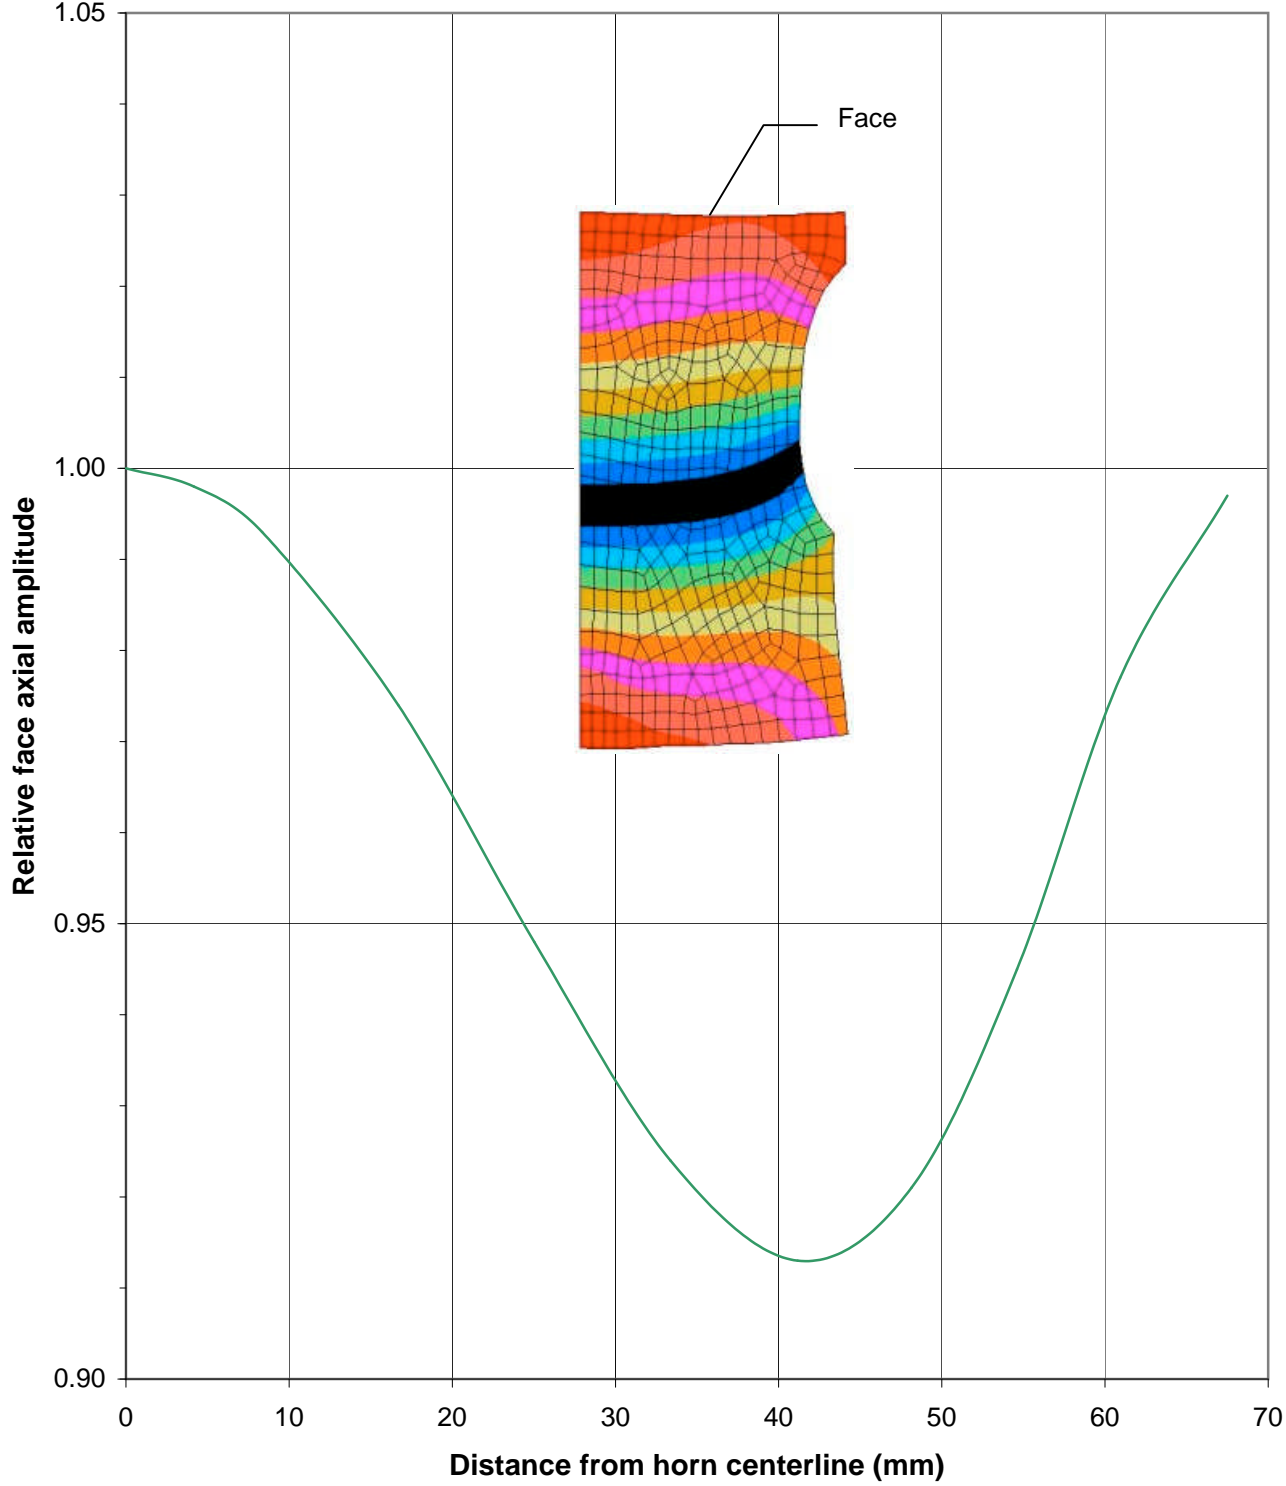

20 kHz Al 7075-T6 Spool Horns - Radial Amplitudes

Y-axis: Radial amplitude at face periphery / Axial amplitude at face center
X-axis: Horn diameter (mm)
20 kHz Al 7075-T6 Spool Horns -
Face Uniformity

**20 kHz Al 7075-T6 Spool Horns -
Gain**

Ø135 mm Al 7075-T6 Spool Horn - Effect of Stud Size on Relative Face Amplitude

Face

Legend:
- Stud = 1/2-20 x 15.9 deep
- Stud = 1/2-20 x 19.1 deep
- Stud = 3/8-24 x 15.9 deep

X-axis: Distance from horn centerline (mm)

Y-axis: Relative face axial amplitude

**Ø135 mm Al 7075-T6 Spool Horn -
Effect of Stud Size on Gain**

Legend:
- Stud = 1/2-20 x 15.9 deep
- Stud = 1/2-20 x 19.1 deep
- Stud = 3/8-24 x 15.9 deep

Y-axis: Gain (0.0 to 1.2)
X-axis: Stud

**20 kHz Al 7075-T6 Spool Horns -
Tuned Lengths**
Effect of Poisson's Ratio on Relative Face Axial Amplitudes of Ø125 mm Al 7075-T6 Spool horn
**Effect of Poisson's Ratio on Relative Face Axial Amplitudes
of Ø110 mm Al 7075-T6 Spool horn**
